FLIP

THE FUTURE IS VOICE

Are you hiding your phone numbers in a spot your customers won't soon find?
Stop it, stop it right now.

A recent Statista Survey revealed that phone remains the preferred method for customers to contact support agents, with 42% of people surveyed identifying that they prefer phone calls to resolve customers service issues.

Flip provides Voice automation technology that is empowered through an Alexa-like experience so your customers feel more connected with your brand.

Brands don't need to bypass other channels or use emojis to invoke trust. They need Voice to make their interactions more efficient, more meaningful, and more memorable.

Voice is the next big channel alongside email, SMS, social.

With Voice, you can stop hiding from your customers and drive LTV.

Voice is a unique and powerful channel.

Voice enables you to provide great service automatically, and so much more.

Curious about the power of Voice and what it can do for your brand?
